Wind Shears can face high consistent damage, but it is better used to finish the opponents. Tornado is immensely disruptive for other classes, due to its wide variety of elementary interactions. When coupled with the toxic glove, it is possible to turn on toxic clouds in Dragonfire fatal explosions. Practice a technique known as "window", where you move sideways instead of backwards while jumping out of the walls. Put a blow levy over the head. Playing against the toxicologist Position the Flamewall as a cover if you get an ambush, as the toxic spray blows cannot go through it. Try to stay on a higher ground as much as possible, and use Firefly if necessary. Most of the witchcrafts and elemental interactions are based on the ground, this can force a work of Stoneshaper above ground. When combined with fire, Shockwave leaves a deadly Fire Trail, integrating its zoning on the ground. Frostborn [] Recommended Gauntlets Recommended Gauntlets Toxic Fire Stone Recommended Runes Recommended Flight Shadowstep featherfall play as Frostborn Frozen Alacrity guarantees you a high mobility, especially when you travel for long distances, Random Build Generator [] See also [] Furthermore, shoot toxic clouds against a pyromancer who is constantly sending the fire balls can be a nice way for chip to their health. The only Tempests is an addiction to their secondary challenge glove to deal with the damage. While you should generally avoid fighting pyromers closely, their Fireball & Toxic Cloud explosions can inflict self-harm. Flash Freeze can quickly change the battle tide by blocking powerful bullets or freezing the opponents for a free shot. When you use the rustle, the qusts to three or four bolts at a time to maintain the noc noc ehcna onattol itnamorip i .ovitom ossets of reP .oirasrevva nu id aiccart erenet rep o .inicyv irotacoig i rep aera'nu erarolpse rep elcicr erasu id ivetadrociR .ililbideverpmi 'Aip etnemloveton otru'd edno el e etnemivom ortsov li erehner 'Aup etneiciffe odom ni slecnac-revoh noc kordeB eralocseM planes. Secondary strikes allow you to cut more easily strokes for exceptional control of the area. If you are a stoneshaper, you can instead use their fires against them by shooting a shock wave through it, leaving a fire path. Take advantage of the application aggressively of the pressure with your secondary glove while recharging. Playing against Pyromancer due to the slow speed of the Fireballs bullet, they become much easier to dodge to long ranges. To this end, breaking their invisibility through the Aoe from witchcraft is also a practicable strategy. This is very convenient to help your team reach Mana's vaults in front of your opponents. Perfecting the time of witchcraft for the short immunity of Tundra is the key to success. Tempest's mobility is largely only of a vertical and defensive nature. Furthermore, if you miss the fire ball from this point of view, it has the possibility of inflicting damage from AOE when it affects the ground. Take advantage of this weakness by starting or fleeing a struggle after rapid trade using your class mobile. Playing against Frostborn The Ice Lance Spell has the highest cost of Mana in the game. I get the jump of the wind together with Dodge or Dash to extend the covered distance. Use it to your advantage by taking quick operations and breaking the line of view. Having the slightest mobility of all classes, the Storni rely on their rune to reposition and chase the opponents. You are looking for distant ice puddles, since they often give the position of a Frostborn enemy. The ducts struggle to keep track of opponents in combat up close, then close the distance when possible. When jumping out of the path, you can keep the same speed until you levitate or land on the ground. Play against storm storms can be slippery, but it requires them e e aciloe atadno'leed osu orol li eratiimL .etatiimil aguf id inoizpo orol el e orepuer id opmet ni 'A enur orol al erntom avisnetfo'lus iaV .oirasrevva nu id imiselnaclni ilg eraccolb rep ovismefid otasu eresse ehcna 'AaP .et a ehc otsoituip arret a arret a eraraps skills by taking fights into tight spaces and castles. When combined with Fracture Vents for extra height, you can gather intel on even more remote fights. Dragonfire explosions and Flash Freeze will clear an area of all fires, including Flamewall segments. However, use this combo with caution, as you lose your mobility option from Vanishing Mists. Wind Shears' unique ability to create Toxic Mist is a potent counter to Toxicologists that aren't careful. It makes hitting your Fireballs much easier. Save a rune charge for when your armor has been broken, this buys you time to safely regenerate it. Wind Shears can be used defensively to deflect fireballs, boulders and even Toxic Clouds. Playing Against Stoneshaper Stoneshapers are extremely terrain dependent. The tick damage numbers from Ignite can also serve as a way of tracking opponents. Accretion increases Boulderfall's size substantially, becoming nearly unavoidable in confined areas. Igniting Toxic Clouds into deadly Dragonfire is a great way to finish off an opponent, especially with Spreading Sickness. Conduit[] Conduit Recommended Talents Recommended Talents Tracking Tough Inspired Recommended Gauntlets Recommended Gauntlets Fire Wind Toxic Recommended Runes Recommended Runes Teleport Chronomaster Shadowstep Playing As Conduit Lightning Bolts are the fastest projectiles in the game, making them excellent for both long range poke and chasing down stragglers. Utilizing Invisibility from runes, you can trigger Outbreak multiple times for immense burst damage. Tempest[] Recommended Gauntlets Recommended Gauntlets Frost Fire Toxic Recommended Runes Recommended Runes Shadowstep Springstep Dash Playing As Tempest Tempest is arguably the most mobile class in Spellbreak once a player masters how to use Wind Surge. Control the flow of battle by staying above them at all times. Vanishing Mists offers exceptional combat mobility, use it to close the gap or ambush your opponents. Initiate fights in tight corridors where it is more difficult for the opponents to avoid your burst. Use their tornado against them by mixing it with other elements to them. Puddle and toxic clouds prove tremendously difficult to face even in these spaces. When they fight Frostborns & Toxicologists, they cover behind your Flamewall to block their spells. Be wary of their numerous AOE options as a combust. Toxicologist [] Gauntlets Recommended Gauntlets Fire Frost Gelo Rune Recommended Runes Recommended ShadowStep Invisibility Dash Play as a toxicologist use toxic spray corrosion to slowly cut the armor of removing an opponent before going to kill. Their mobility is limited during the launch of the bolts, making them an easy target for most witchcraft. Remember that Flash Freeze does not block bullets from above or from the bottom. In addition, they are a heavy counter for air opponents who have fewer options to run for cover. Since Shockwave can only be used on the ground, they fight against air goals. Frostborns are very vulnerable at close range, since they cannot completely recharge the ice spear without becoming an easy target. Stoneshaper [] Gauntlets Recommended Gauntlets Fire Frost Lightning Recommended Runes recommended Springstep Dash Teleport play as Stoneshaper exploit to Massimo Stoneskin using Shockwave while you are repositioning, not only in combat. Toxicologists are mainly lethal at close range, then keep away through the wise use of Rune & Dodge. Remember that you can jump from walls, trees, rocks etc. Apply pressure to force them to Dodge or use a Rune charge, this resetter potential energy. Alternatively, visit the Sanctuary of Frostborn or use the reduction of the freezing of Hardened to completely mitigate their witchcraft and put them on ciripmaV ciripmaV erogiv osoiruC itadnamoccaR itnelaT itadnamoccaR itnelaT etnamorip acifidoM .iratnemelE inoizaretnl eredeV .leravide ehcna onossop sraehS dniW e odanroT .ocouf id ellap el eraccolb onossop inogerts itloM .tsubmoC .tsubmoC morf etingl + egamad hghl s'laberif' ot eud emag yraep lanemonehp a evah s'recnamoryP recnamoryP sA gniyaIP .petsnirpS thgIIF hsaD senuh dednemmocer senuR dednemmoceF gni nthgIL enoTS cixot' steltnuacG dednemmoceR steltnuacG
